SubjectBasis for Joint Cannery Outfall Mixing Zones.doc

Sara,

Here is the information I described on the phone. Although it may not be everything you need it is a starting point. Let me know what you think the next step is and I will work on it. Keep in mind that this is a draft that has not been reviewed by the canneries, therefore it is an informal working document and not a specific request by the permittees, although I doubt there will be much discussion. I also understand that you may adjust limitations based on the last few years of DMR data and based on a reasonable potential analysis.
